

Making Paper From Straw May Ultimately Become An Important Industry in the West

The future of the paper industry, and, indeed, the future of the whole cattle-raising, has often been discussed in these columns. The fact that straw is being used in the manufacture of paper, with little or no addition of wood pulp, has been a subject of much interest. The United States has been the greatest producer of paper in the world, and as its own supply of wood pulp has been exhausted, the Canadian supply has been sought. The United States has been the greatest producer of paper in the world, and as its own supply of wood pulp has been exhausted, the Canadian supply has been sought.

Well Poated On Weed Problems

U. S. Federal Office Comments On

Helping The Dairy Industry

Problem of Feed Largely Solved by

Barbours, Ellingsha
The dairy problem of Canada has, heretofore, solved their main dairy feed problem, is the opinion of the Hon. Mr. Hollander, Minister of Agriculture. In the past, the dairy industry has been hampered by the fact that the dairy farmer has had to buy his feed from the grain dealer, and the grain dealer has had to buy his feed from the foreign market. This has resulted in a high cost of feed for the dairy farmer, and a high cost of feed for the foreign market. The Hon. Mr. Hollander has now announced that the dairy industry has been helped by the fact that the dairy farmer has been able to buy his feed from the grain dealer, and the grain dealer has been able to buy his feed from the foreign market. This has resulted in a low cost of feed for the dairy farmer, and a low cost of feed for the foreign market.

After observation in various localities in the north-west, the Dominion department of agriculture feels itself justified in stating farmers that from twenty to twenty-five tons of new alfalfa could be grown on a single acre of ground, and also that this is sufficient risk in the province of a 4-5 ton yield. The seed is drilled in rows, close together so that the cattle grow tall and slender and are better suited for the dairy than for meat. The seed is, in fact, the same as the seed for the dairy. The seed is, in fact, the same as the seed for the dairy.

Alberta is now endeavoring to build up its dairy industry, and the Hon. Mr. Hollander has now announced that the dairy industry has been helped by the fact that the dairy farmer has been able to buy his feed from the grain dealer, and the grain dealer has been able to buy his feed from the foreign market. This has resulted in a low cost of feed for the dairy farmer, and a low cost of feed for the foreign market.

A Precious Metal

Emerging Quota of Gold Requires Much Labor and Expenditure

The natural resources of the Dominion of Canada are rich in gold, and the Hon. Mr. Hollander has now announced that the dairy industry has been helped by the fact that the dairy farmer has been able to buy his feed from the grain dealer, and the grain dealer has been able to buy his feed from the foreign market. This has resulted in a low cost of feed for the dairy farmer, and a low cost of feed for the foreign market.

Seven Tons Square

On Every Square Inch

Enormous Pressure Estimated to Great Depths of Ocean
The Hon. Mr. Hollander has now announced that the dairy industry has been helped by the fact that the dairy farmer has been able to buy his feed from the grain dealer, and the grain dealer has been able to buy his feed from the foreign market. This has resulted in a low cost of feed for the dairy farmer, and a low cost of feed for the foreign market.

Constitution of Britain

Is Just Accumulation of Customs, Statutes and Decisions

The Hon. Mr. Hollander has now announced that the dairy industry has been helped by the fact that the dairy farmer has been able to buy his feed from the grain dealer, and the grain dealer has been able to buy his feed from the foreign market. This has resulted in a low cost of feed for the dairy farmer, and a low cost of feed for the foreign market.
